FLIP TABLE

Cat. No. 28240

Newly developed product makes turning and transporting larger stained glass windows virtually effortless and risk free. This rotating table enables the artist to fully construct, turn over for soldering, and even transport the completed project to a job site. It is largely fabricated of painted 2" square steel tubing, equipped with a pivoting frame and six inch swivel castoring wheels. Frames on either side are removable to expose work surface of 3/4"

plywood (readily available in 4' x 8' sheets, provided by user). Once project is completed, with frames secured on both surfaces, table is then rotated and locked vertically, thus allowing safe delivery to the job site. The "FLIP" table features a 10" height adjustment range, providing working comfort for individuals of a wide range of heights as well as the ability to match the height of another work surface for easy transfer.

Overall measurements are: 49-1/2" wide x 96-3/4" long, 30"-40" high (approximately 400 lbs., shipped on flat pallet. Some assembly required. Drop Ship from factory.
