1/5 Horsepower Motor

110 Volt, 50-60HZ

220 Volt, 50-60HZ Transformer w/European power cord available

## **FIREBOX 8 KILN**

**Cat. No. 48013**

The FireBox 8 from Skutt is the perfect small kiln for beginners to advanced glass artists. The FireBox 8 plugs into any standard 20 Amp household outlet and since it is compact in size you can fire it up almost anywhere.

- **Fast** - You can always fire slower but if you need to go fast this kiln reaches Glass Fusing temperatures in less than 20 minutes.
- **Accurate** - The easy to read digital pyrometer allows you to know exactly what the temperature of the kiln is.
- **Safe** - Unlike other kilns of its size, the FireBox 8 has a hinged lid so you do not have to worry about where to place the hot lid when you want to work inside the kiln. The lid opens over 90° so it is out of your way when loading or working inside the kiln. The kiln is buckled to the base of the kiln so it can't slip off.
- **Easy To Use** - Using the wooden handle, the lid can be opened with one ungloved hand. The digital pyrometer allows you to precisely tell if the temperature is going up or down, making holding at specific temperatures much easier.
- **Versatile** - The 2000°F (1093°C) rating makes it capable of firing a wide variety of materials, including Ceramics. You can load it through the top or unbuckle the body from the floor, assemble your work, and place the kiln back over the shelf and onto the slab.
- **Portable** - There is a handle positioned on the back of the kiln that makes it extremely easy to carry.

## **WET BELT SANDER**

**Cat. No. 289705**

Gryphon's Wet Belt Sander is a great new tool for the glass artist. It's designed specifically for grinding and polishing large glass surfaces. Perfect for trueing straight edges on any sized piece or for smoothing the edges on larger work, such as bowls. The belt offers 90 square inches of grinding surface, and makes quick work of your biggest projects. It's indispensable for the warm and hot glass artist.

115 volts a.c., 60 hz, 1.83 amp, 3000+/-15% R.P.M.
