## NEW SOUTH BEACH FRAMES

Frame displaying artwork

### SOUTH BEACH FRAME WALL LIGHTING SYSTEM

The South Beach Frame is an innovative bracket designed by Handley Industries (a renowned lampbase manufacturer) that enables crafters to easily mount and illuminate their art glass on any wall. Simply attach the metal frame to the wall using the acrylic mounting plate, snap in the pre-wired bulb socket and slide your glass panel down into the slot. That's it - your art glass wall sculpture is now professionally displayed.

Overall width is 11-7/8" (30cm) across the top spread of the "v"

Height is 10-1/4" (27cm). Depth is 3" (7.5cm), however the mounted panel would be 2-1/16" (5cm) from the back.

Will accommodate a panel up to 10-1/2" (27cm) in diameter. Although a circle is a natural match for this frame, most geometric shapes will work perfectly, as will many freeform shapes.
