HEALTH - 2 FLAMMABILITY - 3

SECTION 1 CHEMICAL PRODUCT AND COMPA	NY IDENTIFICATION
Identity: Lapis Blue Color Magic	Note: Blank; spaces are not permitted. If any item is not
Item No: 213	applicable, or no information is available, the space must be
Formula: 8719D1	marked to indicate that.
Distributed by:	Emergency Telephone Number:
Hoevel Mfg.	310-313-6829
Address:	Telephone Number for Information:
12102 Venice Blvd, Los Angeles, CA 90066	310-313-6829
Product Class: Staining Colors	Date Prepared:
	2/13/04

SECTION 3 HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW -Red thin viscosity liquid with sweet solvent odor. Warning! Flammable liquid and vapor. Keep away from beat sparks and flames. May cause eye, skin and respiratory tract irritation. If swallowed do not induce vomiting. Get immediate medical attention.

POTENTIAL HEAL TH EFFECTS

Eyes: Liquid is moderately irritating to the eyes.

Skin: Liquid is mildly irritating to the skin.

Ingestion: Ingestion of liquid may cause vomiting.

Inhalation: High concentration of vapors may produce irritation of the respiratory tract, headache. dizziness. and nausea

CHRONIC HEALTH EFFECTS

Prolonged or repeated contact may cause skin sensitization or dermatitis. Reports have associated repeated and prolonged occupational overexposure to solvents with irreversible brain and nervous system damage. Intentional misuse by deliberately concentrating or inhaling this product may be harmful or fatal

SECTION 4 FIRST AID MEASURES

Eyes -Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately. **Inhalation** -Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Skin – Flush skin with plenty of water. Remove contaminated clothing and shoes.

Ingestion- If large quantities of this material are swallowed, get immediate medical attention. Do not induce vomiting. Never give anything by mouth to an unconscious person.

SECTION 5 FIRE FIGHTING ME	CASURES		
Flash Point (Method Used)	Flammable Limits	LEL	UEL
24°F		1.40	19.0

Extinguishing Media -

Use water fog, foam, dry chemical or CO2. Use water spray to cool fire-exposed containers and to protect personnel.

Special Fire Fighting Procedures -

Keep containers cool and vapors down with water spray. Prevent spill from entering drains, sewers, streams or other bodies of water. If run-off occurs, notify proper authorities. Do not enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots), including a positive pressure NIOSH approved self-contained breathing apparatus.

Unusual Fire and Explosion Hazards – Vapors are heavier than air and may travel along ground, or be moved by ventilation and be ignited by ignition source.

SECTION 6 ACCIDENTAL RELEASE MEASURES

SMALL SPILL: Absorb liquid with non-combustible floor absorbent and place in non-leaking container; seal properly and dispose of properly in compliance with federal, state, and local regulations.

SECTION 7 HANDLING AND STORAGE

HANDLING: Empty containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, sparks, flames, static electricity, or other sources of ignition. Many hot organic chemical vapors or mists are susceptible to sudden spontaneous combustion when mixed with air. Ignition may occur at temperatures below those published in the literature as "autoignition" or ignition temperatures. Ignition temperatures decrease with increasing vapor volume and vapor volume and vapor/air contact time, and are influenced by pressure changes. Ignition of organic chemical vapors may occur at typical elevated-temperature process conditions, especially in processes operating under vacuum if subjected to sudden ingress of air, or outside process equipment operating under elevated pressure if sudden escape of vapors or mists to the atmosphere occurs. Any proposed use of this product in elevated-temperature processes should be thoroughly evaluated to assure that safe operating conditions are established and maintained.

STORAGE:

Keep away from heat, sparks and open flames. Keep out of reach of children. Keep container tightly sealed when not in use. Store in cool, well-ventilated place away from incompatible materials.

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Respiratory Protection (Specify Type) -

Not usually necessary. Use with adequate ventilation. Use NIOSH/MSHA approved respirator if PELs or TLVs are exceeded.

Engineering	Local Exhaust	Not usually needed	Special	None
Controls	Mechanical (General)	Yes	Other	None`
Protective Gloves – Chemical resistant gloves		es Eye Protection – Not normally required if used as		red if used as
if skin contact is possible (consult your safety		ty intended. Wear chemical splash goggles in compliance		gles in compliance
equipment supplier).		with OSHA regulation if splashing is possible.		

Other Protective Clothing or Equipment -

Not usually necessary. For bulk material, if direct contact is possible, wear apron, boots, face shield, etc. as needed.

Work/Hygienic Practices -

Follow label instructions. Wash hands after use and before eating, drinking, smoking, using restrooms, etc. **SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**
